Index

A

ADABAS, 67
American Statistical Association, 49
Anthony, R., 12, 24
APL, 56
Apple microcomputer, 3, 9–10
Artificial intelligence (AI): concept and development of, 19–21; and microcomputers, 23
Assembler, 48
Association for Institutional Research (AIR), 9

B

Backups, concept of, 42
BASIC, 35, 48, 56
Baud, concept of, 46
Bell Labs, 61
BITNET, 27
Bits, concept of, 41
Blin, J. M., 21, 24
Bloom, A. M., 34, 38
Bloomfield, S. D., 16, 24
Bonner, P., 23, 24, 90, 91
Brinkman, P. T., 2, 11–25, 94, 95
Bubble memory, features of, 43

C

C language, 48
Carlson, E. D., 14, 16, 25, 79, 80, 83, 85
Cathode ray tube (CRT), 44
Central processing unit (CPU), 41
Chachra, V., 2, 63–75, 94, 96
Change, and computerization, 6–7, 10
Chomsky, N., 20
COBOL, 48
Cognitive psychology, and computer-based information systems, 21–22
Colorado-Boulder, University of, specific decision support systems at, 78
Communication: analysis of microcomputers for, 53–62, 94–95; features for, 50–51; issues in, 61–62
COMPAQ microcomputer, 3
Complementary-metal-oxide-semiconductor (CMOS) memory, 43
Computation, evolution of, 28
Computer-aided design/computer-aided manufacturing (CAD/CAM), 50, 67, 72
Computer-based information systems (CBISs): analysis of, 11–25; background on, 11–12; concepts in, 12–18; and microcomputers, 22–24; summary on, 24; and supportive research, 18–22; trends in, 12
Computerization: analysis of second wave of, 5–10; background on, 5–6; and change, 6–7, 10; conclusion on, 74–75; costs of, 65–66; and decision support management 77–85; micros, minis, and mainframes for, 63–75; multiplier effect of, 64; and societal trends, 7–8, 9–10; and technological development, 8
Computing: charging for, 70–71; decentralization of, 71–74; job shop mode of, 70; library mode of 70–71; types of, 69; utility mode of, 70
Computing center, responsibility of, 71–72
Control program/microcomputers (CP/M), 47, 61
Cornell University, and EFPM, 33

D

Data: concept of, 12–13; shared, issues of, 89
Data base management system (DBMS), concept and development of, 14–15
Data base systems, features for, 50
Data management, applications of, 34–35
Decentralization: managing, 71–74; trend toward, 9
Decision support management (DSM): analysis of, 77–85; background on,

DSM *(continued)*
77–78; concept of, 83; and information anarchy, 81–82; and institutional research, 83–84
Decision support systems (DSSs): background on, 78; concept and development of, 17–18, 78; iterative design of, 79; microcomputers for, 56–57, 95–96; right-brained, 21; structure of, in higher education, 78–81
Department, responsibility of, 72–73
Departmental computing, concept of, 69
Departmental workstations, microcomputers for, 59–60
DIALOG, 34
Digital Equipment Corporation, 50
Digital Research Corporation, 61
Digitizer, features of, 44
Disk drive, features of, 42
Display, 44
Double-sided double-density (DS/DD) diskettes, 42
Duda, R. O., 20, 25
Dunn, J., 34

E

EDUCOM, Financial Planning Model (EFPM) of, 32, 33
EDUMAIL, 58
EDUNET, 33, 34
Electronic computer conferencing (ECC): microcomputers for, 58–59; potential of, 8
Electronic data processing (EDP), concept and development of, 13
Electronic disk, features of, 43
Electronic forms, and microcomputers, 59
Electronic message systems (EMSs), microcomputers for, 58
Electronic spreadsheet: applications of, 31–32; features for, 49; and microcomputers, 22–23, 57; potential of, 8
Electronic worksheets, dedicated, 23
ELIZA, 20–21
E-MAIL, 58
ERIC, 29, 34
Evans, C., 1, 3, 6, 10, 93, 97
Execucom Systems Corporation, 1*n*, 79, 84
Expert systems, concept and development of, 20

F

File server, 60
File transfer program, applications of, 34
Firmware, concept of, 42
Floppy disk, features of, 42
FORTRAN, 48, 67
Fridlund, A. J., 10
Fuzzy sets, concept and development of, 21

G

Gabel, D., 16, 25
Garfield, E., 20, 25
Global computing, concept of, 69
Graphics: analytical, 50; applications of, 32–33; and cognitive psychology, 22; features for, 49–50; and mediation, 22
Gray, P. E., 81
Greene, J. O., 23, 25
Grosch, H., 63
Grosch's Law, 63, 74

H

Hackman, J. D., 22, 25
Hample, S. R., 82, 84
Hardware: concept of, 40; costs of, 65; features of, 41–47; for input, 43–44; issues of, 89; for output, 44–47
Harvard University, budget planning models at, 32
Higher Education Data System, 34
Hopkins, D. S. P., 16, 17, 18, 25
Huber, G. P., 22, 25
Hutten, L. R., 2, 39–52, 93, 94, 95, 96

I

IBM, 32, 39, 50, 65; Personal Computer of, 47, 61
Icons, concept of, 48
Idea processors, and microcomputers, 23
IMS, 67
Individuals, responsibilities of, 73–74
Information: anarchy of, 81–82, 89, 96; archipelago of, 83, 88, 96; concept of, 13
Information assistant, 59

Information society, trend toward, 7–8
Information Toxicity Syndrome, 10
Institutional research: analysis of microcomputers for, 27–38; and decision support management, 83–84; defined, 28; evolution of, 28; responsibility of, 83
Integrated voice data (IVD) facilities, 61
Intelligent terminal, 59
Intelligent workstations, microcomputers as 33–34, 58–59
Interactive financial planning simulations (IFPS), 1*n*, 79
International Standards Organization (ISO), 60

J

Jamieson, D. M., 2, 53–62, 95, 96
Jarett, I. M., 22, 25
Jedamus, P., 3, 77–85, 89, 95–96
Jobs, S., 3
Johnson, R. R., 29, 38

K

K, concept of, 41
Kaplan, A., 15, 25
Keen, P. G. W., 19, 22, 25, 78–79, 85
Keyboard, features of, 43–44
Knowledge engineering systems, concept of, 20
Kruglinski, D., 15, 25

L

Languages, programming, 48
Lasden, M., 88, 91
Laser recording, features of, 43
Lawrence, L. L., 25
Liquid crystal display (LCD), features of, 45
LISP, 67
Local area networks (LANs): microcomputers for, 60–61; and personal computing, 69
Local computing, concept of, 69
Lotus Development Corporation, 1*n*
Lotus 1-2-3, 1*n*, 28, 32, 34

M

McCredie, J. W., 36, 38
McFarlan, F. W., 88, 91
MacKay, K. H., 2, 53–62, 95, 96
McKeefery, W. J., 64, 75
McKenney, J. L., 22, 25, 88, 91
Magnetic tapes, features of, 53
MAILNET, 58
Mainframes, application areas for, 66–67
Management control: and decision support systems, 80–81; and information system, 12
Management information system (MIS): concept and development of, 14; and modeling, 17
Management science, concept and development of, 18, 23
Management support, kinds of, 12
Mann, R. L., 28, 29, 38
Massachusetts Institute of Technology (M.I.T.): interactive computing work at, 17; strategic planning at, 81
Massy, W. F., 16, 25
Mediation, and microcomputers, 22
Memory and storage, features of, 41–43
Menus, concept of, 48
Meredith, M., 3, 87–91, 95, 97
Microcomputers: analysis of, for institutional research, 27–38; applications of, 28–35, 68–69; characteristics, 88; compatible, 47; and computer-based information systems, 22–24; conclusions on, 93–97; for distributed information processing, 53–62; example of using, 27–28; expectations about, 88; guidelines for using, 35–38; impact of, 37–38, 87–88; implementing system for, 36–37; increased interest in, 94; information system roles of, 23; as intelligent terminal, 33–34, 58–59; issues related to, 87–91; portable, 46–47; purchasing, 35–36, 40, 51–52, 96; resource requirements for, 90–91; security of, 31; technical tools for, 89–90; typical system configuration for, 46
Microprocessor, features of, 41
Microsoft Corporation, 61
Microsoft disc-operating system (MS-DOS), 47, 61
Microware: analysis of, 39–52; background on, 39–40; hard, 41–47; soft, 47–51
Mims, R. S., 78, 83, 85, 96, 97
Minicomputers, application areas for, 67–68

Modeling: concept and development of, 15–17; and microcomputers, 23
Modem, features of, 46
Monitor, features of, 44–45
Montgomery, J. R., 34, 38
Mouse, features of, 44
MPSX, 67
Multicriteria decision making (MCDM): concept and development of, 19; and fuzzy sets, 21

N

Naisbitt, J., 2, 3, 7, 8, 9, 10
Natural language (NL) processing: concept and development of, 20–21; and microcomputers, 23
Negoita, C. V., 21, 25
Networking: concept of, 43; features of, 90; local area, 60–61, 69; role of, 96; trend toward, 9
Norris, D. M., 32, 38, 78, 83, 85, 96, 97
Numerical analysis, applications of, 30–32

O

Operating system: for communication, 61; features of, 47–48
Operational control: and decision support systems, 80–81; and information system, 12
Operations research and management science (OR/MS): concept and development of, 18; and microcomputers, 23
Optimization models, concept of, 16

P

Participatory democracy, trend toward, 9
Pascal, 48
Personal computers. *See* Microcomputers
Personal computing, concept of, 69
Personnel: conflicts between, 90; costs of, 66
Pixels, 44–45
Plane, D. R., 78, 85
Plotter, features of, 46
Printer, features of, 45–46
Programming: custom, 35; languages, 48

R

Random access memory (RAM), features of, 41–42, 43, 49
Raster scan, 44–45
Read-only memory (ROM), features of, 41, 42, 48
Ridge, J. W., 33, 38
Rivett, P., 18, 25
Robey, D., 22, 25

S

Saunders, L. E., 34, 38
Saupe, J. L., 28, 38
Schmid, C., 22, 25
Schmid, S., 22, 25
Schroeder, R. G., 18, 25
Scott-Morton, M. S., 78–79, 85
Screen, use of, 44
Self-help, trend toward, 9–10
Sheehan, B. S., 89, 91
Shortliffe, E. H., 20, 25
Simon, H. A., 17, 19, 25
Simulation models, concept of, 16
Single-sided single-density (SS/SD) diskettes, 42
Smart desk, 59
SNOBOL, 67
Software: and applications programs, 48–51; concept of, 40; costs of, 65–66; features of, 47–51; issues of, 89
Solomon, M. B., 63, 75
Sonenstein, B., 25
Sorcim, Inc., 1*n*
Source, The, 34
Specific decision support systems (SDSSs), potential of, 78, 80, 81, 82
Sprague, R. H., Jr., 14, 16, 25, 79, 80, 83, 85
Staman, E. M., 91
State University of New York at Albany, custom program at, 35
Statistical analysis packages: applications of, 30–31; features for, 49
Statistical Package for the Social Sciences (SPSS), 32
Stewart, T. R., 5, 10
Strategic planning: and decision support systems, 80–81; and information system, 12
Sumeria, data processing in, 13
SuperCalc, 1*n*, 32

Suttle, J. L., 2, 27–38, 94, 95, 96, 97
System, concept of, 13

T

Tactical planning, and decision support systems, 80–81
Technological development, stages of, 8
Telecommunications, applications of, 33–34
TELENET, 28, 33
Telephones, private or computerized branch exchanges for, 61–62
Terminal, use of, 44
Terminal emulation program, applications of, 33
Tetlow, W. L., 1–10, 93–97
Thierauf, R. J., 79, 85
Timm, N. H., 17, 25
Toffler, A., 1, 3, 6, 7, 10, 93, 97
Tracks, concept of, 42
Trends, societal, and computerization, 7–8, 9–10
Tschectelin, J. D., 25
Tufts University, and data exchange, 34

U

United Kingdom, operations research in, 18
U.S. Department of Commerce, 7
UNIX, 47, 61
Updegrove, D. A., 16, 24

V

Very large-scale integration (VLSI), 41 68
Virginia Polytechnic Institute and State University, device-to-port ratio at, 68
Voice mail, and telephones, 62

W

Western Electric, 61
Winchester disk, features of, 42–43
Wizenbaum's work, 20–21
Word processing: applications of, 29–30; features for, 48–49; microcomputers for, 54–56; training for, 54–55

Y

Yager, R. R., 21, 25
Yale University, budget planning models at, 32
Young, L. F., 21, 25

Z

Zeleny, M., 14, 18, 21, 25
Zinsser, M., 30, 38
